A proposal has been floated to form a Natural Resource Management Group under the auspices of the Royal Society of New Zealand to act as a “clearing house and co-ordinator” of environmental issues. Other roles are also suggested. Thirteen representatives of various societies and institutes met in Wellington to discuss the umbrella group’s formation. Many of these other bodies have suffered from falling membership, increased administration costs and static annual fees.

Unanimous agreement for the formation of such an “umbrella” group was given, although several bodies, including this Institute, stressed the need to retain autonomy and identity when, and if, a conflict of interest arose. Like most meetings of this sort in New Zealand, a working group of mainly Wellington-based people was formed to consider roles and administration of the group. This Working Party was to meet in late January or early February.

The Royal Society was seen by those present as the most suitable vehicle to expedite any new role by virtue of its:
- contacts in Wellington, e.g. the new Ministry of Science (Foundation for Research, Science and Technology);
- establishment in this area of work, mitigating ‘set up’ costs;
- computerised filing and membership systems as well as managerial continuity and back up.

Antagonists towards the Royal Society said that it was “a bunch of self-gratifying old fuddy duddies”. Few of the bodies present countered this statement.

Figure 1. Natural Resource Management “Umbrella Group” – Relationship to the Royal Society of New Zealand.

The Scientific Societies such as this Institute could possibly form a separate group within the Royal Society distinct from the fellowship. A simplified schematic representation of the proposal appears below.

The Scientific Societies would possibly comprise seven separate subgroups, viz: Land, Earth, Social, Maths/Physics, Biological, Medical/Human, Technical.

The Institute is interested in your views on this matter and is preparing a preliminary submission to the Working Group. If you wish to present your views, please contact either Paul Baker, Fax (04) 264-171, C/- P.O. Box 40-847, Upper Hutt, or Lindsay Vaughan, Fax (073) 462-886, C/- LIRA.

Wellington Section report

Paul Baker, Chairperson
Susan Keenan, Secretary

The Wellington Section had an interesting year with evening seminars, a meal, closer relations forged with the local Farm Forestry Association and actively participating in environmental issues affecting forestry.

New Venues, Topics
It was pleasant to do things a little differently, with new venues and discussion topics. Farm Forestry Association members showed an active interest in all events held by the section, and Institute members reciprocated by attending several Farm Forestry field days. October

Fellowship et.al.
Royal Society Board

To the Hon. Phil Goff and the Department of Labour. Their response, in turn, was to use the RESTART scheme which is funded quite differently!

Last but not least, I would like to thank the Section’s Secretary, Susan Keenan, for her unstinting enthusiasm and dedication.
